Customize is possible to manage such as safety system for production facility.

- To see visually under operation, it is possible to equip buzzer or warning light.
- Handling assist for heavy container. SK-10000T/TV
- Dry vacuum pump can be selectable.

Handling assist
(SK-10000T/TV)

Specifications

	SK-4000T	SK-4000TV	SK-10000T	SK-10000TV
Type	Standard type	Vacuum equipped type	Standard type	Vacuum equipped type
Container	4000ml HDPE container or SUS container		7000ml HDPE container or SUS container	
Max capacity	5kg(Including container) x 2 cups		10kg(Including container) x 2 cups	
Revolution speed	120 - 600 rpm, 9 levels		100 - 400 rpm, 9 levels	
Rotation speed	0 -1.0 times against Rev speed, 10 levels		0 -1.0 times against Rev speed, 10 levels	
Setup time	10 -300 sec (10 decimal sec)		10 -300 sec (10 decimal sec)	
Step mode	1- 5 Step		1- 5 Step	
Memory Channel	Fixed CH: 10CH User settable CH: 90CH		Fixed CH: 10CH User settable CH: 90CH	
Power source	Three phase 200 -240V, 50/60Hz		Three phase 200 -240V, 50/60Hz	
Electric	Max 15KVA		Max 20KVA	
consumption Outer dimension	W1,330×D1,010×H1,120 mm	W1,330×D1,010×H1,120 mm (Vacuum pump excluded)	W1,900×D1,300×H980 mm	W1,900×D1,300×H980 mm (Vacuum pump excluded)

* It differs machine throughput depending on materials characteristic.
* Revolving speed may change depending on materials characteristic.
* Detailed specification may change without prior notice.

SK-10000TV Vacuum Model

SHASHIN KAGAKU

www.kakuhunter.com/en/

Drastically enhanced Productivity!

1. Easy operation on touch panel!

- Settable CH is max 100CH.
- It enables to change CH name depends on usage.
- Password lock function for setting.

2. Operation efficiency and Safety requirement!

- It has invert function for container in order to remove easily.
- Compact design with large operation space. SK-4000T/TV

3. Vacuum machine feature

- Selectable non vacuum or vacuum type
- Enables to select each vacuum level per cup tray individually.
- Customize model for specific container
- Adjustable each revolution and rotation speed (0 - 1.0 times)
- Enhanced mixing and degassing force with individual revolution and rotation speed control system equipped machine.
